## TRA01 TREE RING

Congratulations on your purchase of this high-quality product! We want to ensure that you have the best possible experience with it, so we kindly ask that you take a moment to carefully read and follow all instructions before assembly, installation, and use. By doing so, you'll not only guarantee correct function and safety, but also optimize the full potential of this exceptional product. Thank you for choosing us as your trusted provider of top-notch products - we truly appreciate your business!

### IMPORTANT SAFETY INSTRUCTIONS

**WARNING: TO REDUCE THE RISK OF FIRE OR INJURY TO PERSONS:**

- ✔ We recommend taking necessary safety measures.
- ✔ For your safety, please refrain from touching the **HOT** lens, guard, or enclosure. We recommend waiting for the product to cool down before handling it.
- ✔ To prevent any fire hazards, please ensure that the lamp is kept away from materials that may easily catch fire. We appreciate your cooperation in maintaining a safe and secure environment.
- ✔ For safety reasons, we recommend that only a qualified professional install this product.
- ✔ Before attempting to install this unit, ensure all power connections are off for your own safety.
- Warranty will be void if there is any damage due to improper usage or modification to the unit.
- Failure to comply with the instruction in this manual may increase the risk of damage or injury and will void warranty.

**CAUTION:**

Fixture(s) must be installed in accordance with all local codes and ordinances.  
Do not instal within 10 feet of a pool, spa or fountain

**INSTALLATION INSTRUCTION**

Materials Needed:

1. TRA01 ring mount kit
2. Drill
3. Allen Wrench
4. Level
5. Measuring tape
6. Pencil

Instructions:

- Choose the Location: Select a suitable location on the tree where you want to install the tree ring mount. Make sure the area is clear of any obstructions and the tree is healthy.
- Measure and Mark: Use a measuring tape to determine the desired height for the tree ring mount. Mark the position with a pencil.

Secure the bolt by attaching the nut.

- Place the bolt through the hole in the ring.

- Secure the bolt by attaching the nut.

- rotate the rubber cap clockwise to cover the nut and ensure a tight seal.

- Before installing the tree ring onto the tree, it is recommended and safe practice to first place all the selected spotlights into the ring. Insert the base of each spotlight into the corresponding hole in the ring, then secure them by tightening the provided nut.
- We suggest choosing from our stylish spotlight designs available in our collection for optimal aesthetic appeal.

- Once you've connected all the required wires for power, double-check to ensure all connections are properly set and secure. When you're confident that everything is in place, prepare the tree ring for installation onto the tree.
- Assemble the mounting brackets. Secure the tree ring in place by fastening one side with the screws provided in the kit. Utilize the Allen wrench included in the kit to tighten the screws firmly.

- Position the mounting bracket against the tree at the designated marked spot. Utilize the four bolts previously inserted into the tree ring to fasten it securely. Ensure that the brackets are level before proceeding.
- Ensure that the tree ring is stable and securely attached.
- Check for Stability: Gently shake the tree ring to ensure it is securely attached to the tree. Make any necessary adjustments to ensure stability.
- Final Inspection: Stand back and visually inspect the installed tree ring mount to ensure it is level, secure, and aesthetically pleasing.

Maintenance: Periodically check the tree ring mount to ensure it remains secure and stable. Tighten any screws if necessary, and inspect for any signs of wear or damage.

Following these steps should help you install a tree ring mount securely and safely onto a tree. Make sure to read and follow any specific instructions provided with your tree ring mount kit for the best results.

The minimum radius required for placing the tree ring is 7.8"

The maximum radius required for placing the tree ring is 23"
