WARNING

TO REDUCE THE RISK OF FIRE OR INJURY TO PERSONS:

- ✔ Please exercise caution when using the lamp, as it tends to HEAT up rapidly. We recommend taking necessary safety measures to ensure optimal usage.
- ✔ For your safety, please refrain from touching the HOT lens, guard, or enclosure. We recommend waiting for the product to cool down before handling it.
- ✔ To prevent any fire hazards, please ensure that the lamp is kept away from materials that may easily catch fire. We appreciate your cooperation in maintaining a safe and secure environment.
- ✔ For safety reasons, we recommend that only a qualified professional install this electrical product.
- ✔ Before attempting to install this unit, ensure all power connections are off for your own safety.

WARRANTY

- We stand behind the quality of our product and offer a 1 Year warranty. Kindly ensure that you keep the proof of purchase as it will be required for any warranty claims.
- Warranty will be void if there is any damage due to improper usage or modification to the fixture.
- Failure to comply with the instruction in this manual may increase the risk of damage or injury and will void warranty.

PRODUCT OVERVIEW

The GL30 Moonlight is a stunning outdoor lighting fixture that transforms any exterior space into a luminous, sculptural environment. Designed with form and function in mind, this piece resembles the serene glow of the moon itself. Whether placed on the ground, mounted on a post, or suspended, it creates an elegant focal point that enhances both residential and commercial landscapes.

Crafted from a durable fiberglass and resin body and finished in a distinctive “moon-style” surface, the GL30 Moonlight delivers both visual beauty and weather-ready performance. Participating in both ambient mood lighting and functional illumination, this fixture becomes a conversation piece while performing reliably in outdoor conditions.

MOON-INSPIRED DESIGN

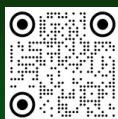

Its spherical form and gentle lighting effect evoke a sense of calm and elegance, elevating outdoor spaces into refined environments.

FLEXIBLE MOUNTING OPTIONS

Comes with a ground-spike for easy installation in lawns or gardens; optional post-mount or hanging chain (accessory) allow further versatility.

LARGE DIAMETER FORMAT

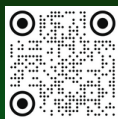

At approx. 30 cm in diameter, the fixture offers presence and scale suitable for driveways, terraces, feature gardens or entryways.

E27 BULB SOCKET

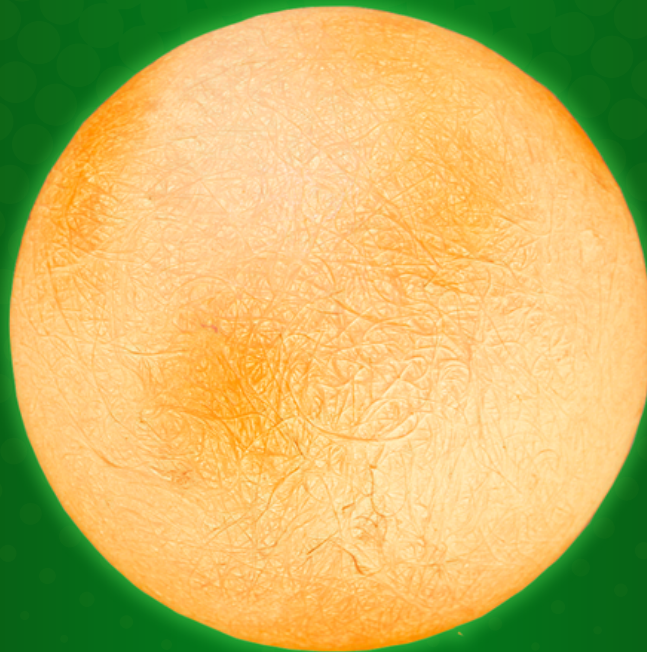

Accepts standard E27 lamps (sold separately) allowing you to select from warm white, daylight or RGBW options, depending on your design intent.

OUTDOOR-RATED (IP65)

Fully sealed against dust and rain, this light is built for all-weather performance.

DURABLE CONSTRUCTION

Fiberglass/resin housing ensures longevity and a striking finish that stands up to UV, moisture, and elements.

IDEAL APPLICATIONS

- Feature-lighting in upscale residential gardens or front yards
- Highlighting terrace edges, poolside areas, or outdoor lounge zones
- Hanging or mounted installations in pergolas, patios, or covered exterior settings
- Commercial outdoor hospitality spaces, such as resort pathways or hotel courtyards
- Design-led environments where the fixture itself contributes to the aesthetic

IMPORTANT SAFETY INFORMATION

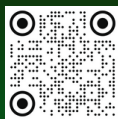

To ensure optimal performance and safety, always use our fixtures ONLY with a low-voltage landscape transformer. This transformer reduces the voltage from 120V to 12V, making it safe and suitable for outdoor use. Failure to follow these guidelines may result in electrical hazards or damage to the fixture.

INSTALLATION GUIDE FOR GL30

INSTALLATION INSTRUCTIONS

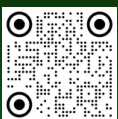

Plan Your Layout

- **Determine Placement:** Choose the path or area where the lights will be installed. Measure the distance between lights to ensure even illumination. A typical spacing is 6–10 feet apart, depending on the desired light spread.
- **Consider Power Source:** Ensure that the Spotlight can be connected to a suitable power source. Ensure that the input voltage of the light cable wires is 12V AC/DC. Using improper voltage may cause malfunction or permanent damage to the fixture.

Installation Type 1 – Ground Stake Mount

Used for: Garden beds, lawns, and pathways.

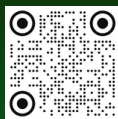

- Insert the provided stake firmly into the ground, ensuring it is level and stable.
- Attach the GL30 Moonlight onto the stake mount connector. Tighten securely.
- Connect the fixture's wire to the main low-voltage line using waterproof connectors.
- Carefully bury or conceal the wiring below the soil surface
- Turn on the power to check illumination. Adjust the orientation of the sphere if necessary.

INSTALLATION GUIDE FOR GL30

Installation Type 2 – Base / Post Mount

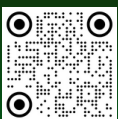

Used for: Driveway pillars, patios, decks, or hardscape installations.

- Secure the mounting base onto the post or surface using screws.
- Ensure the surface is flat and stable.
- Pass the fixture's cable through the center hole of the base and pull it through the underside.
- Connect wires to the low-voltage supply line with waterproof connectors.
- Place the GL30 Moonlight onto the base and tighten the set screw or threaded collar.
- Power on to verify illumination and check for stability.
- Tip: Apply a small bead of outdoor silicone sealant around the cable entry point for added moisture protection.

Installation Type 3 – Hanging Mount

Used for: Pergolas, covered patios, trees, or architectural overhangs

- Select a secure hanging point capable of supporting at least 3× the fixture's weight.
- Attach the hook or chain to the fixture's top eyelet securely.
- Run the fixture cable along the chain or support wire, keeping it neatly tied and free from strain.

7701 Alabama Ave, Canoga Park, CA 91304

INSTALLATION GUIDE FOR GL30

- Route the cable to your transformer or main line, and connect using outdoor-rated waterproof connectors.
- Test illumination and adjust hanging height and orientation as desired.
- Tip: For tree mounting, use flexible ties instead of nails or screws to prevent trunk damage.

Wire Connection Instructions

Strip the insulation: Carefully strip approximately $\frac{3}{4}$ inch (1.9 cm) of insulation from the ends of the two wires to be connected. Ensure that the exposed metal ends are clean and free of frayed strands.

Align the wires: Hold the stripped ends of both wires together, making sure they are neatly aligned with no stray strands crossing over.

Twist the wire nut: Firmly twist the wire nut clockwise onto the wires until it is tight and secure.

Insert the wires into the wire nut: Push the aligned wire ends all the way into the wire nut, ensuring that the bare metal is fully covered.

Test the connection: Gently tug on each wire to ensure they are firmly held in place and will not come loose.

Inspect the connection: Ensure that no exposed wires or loose strands are visible. If the connection is not secure, remove the wire nut and repeat the process.

⚠ Note: Always follow local electrical codes and regulations when performing electrical work. If unsure or uncomfortable with electrical tasks, consult a qualified electrician. Safety should always be a top priority.

MAINTENANCE TIPS

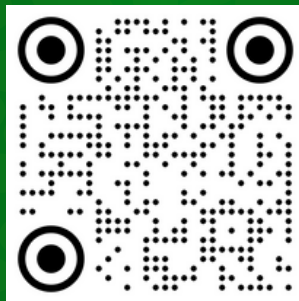

- **Regular Inspection:** Periodically check the bracket and fixture to ensure they are still securely mounted and functioning correctly.

SAFETY PRECAUTIONS

- Always wear appropriate safety gear, such as gloves and safety glasses, during installation.
- Ensure the mounting surface is capable of supporting the weight of both the bracket and the lighting fixture.
